Significant Events

Date: 2017/02/03 **Time:** 06:20 **Type:** Spill Report (NRC#: 1169875)

Location: TRENTON, TX (COLLIN County)

Description: Enterprise removed all free product from the discharge area. Approximately 4100 bbls of free oil was recovered. Once the free oil was removed, VOC and Benzene levels dropped to levels that did not require respiratory protection. Soil removal and disposal began at the southern portion of the discharge area. EPA and TRRC met with Enterprise and discussed state sampling requirements. A draft sampling plan was provided to the TRRC. A 7 day IAP was approved. EPA and START demobilized, but will return next week to document soil excavation activities and to ensure the Weather Contingency Plan was still being implemented. The two Enterprise employees injured on Wednesday from the vehicle accident are both stable.

Field Operations

9810925

Activity: Choctaw Bayou Oil Spill

Location: Plaquemines LA

Contact: Brandi Todd

Start Date: 2017/01/31 **Type:** Removal Action **Status:** Active

Comments: On 02 February 2017 at 0600, Oil Mop mobilized approximately 50 personnel to the site with associated equipment (boom, absorbent pads, boats, pumps and hoses, vacuum trucks, roll-off boxes, rakes, etc.) and began response efforts. Boom was placed to prevent further spread of oil. Sorbent pads were placed in heavier, isolated pockets of oil. Pumps were used to spray water and push floating oil to collection points for vacuum by vacuum truck. Oiled vegetation and debris was bagged and removed.

Exercises

No exercises for this reporting period
